

KATZROAR

releases

KATZROAR's debut album *INVOCATION* (2021) is a mythological psych rock soundscape that tells the story of *The Odyssey* from the mouth of the muse herself.

Her forthcoming EP, *EVOLUTION* (2024) suggests a new, more experimental sonic era for KATZROAR that takes us on the emotional journeys of grief, praise, and emergence. Here, KATZROAR defines her sound as an artist as she blends psych, funk, soul, surf, and indie rock with powerful, evocative, pop vocals.

sound

Multi-genred wailing vocals, effected guitars, and groovy bass lines echo revolutionary artists such as Santana and Pink Floyd, combined with the witchy spirit of Janis and Stevie. KATZROAR restores soul to the psychedelic scene with a sound that is nostalgic, familiar, reflective of contemporaries like Khruangbin, yet fresh with imagination and expression of a solo female artist.

about

Singer, songwriter, bass player and producer KATZROAR sets herself apart as one of the few female muses of the psychedelic rock scene, one with a voice and a vision.

Through poetic storytelling, emotive vocals and instrumental landscapes, KATZROAR takes listeners on a journey that is truly psychedelic -- one that expands our minds and connects us to the soul of the world, at a time when we as humans need it most.

The project is led by Katya (Kat) Villa, known as the artist KATZROAR. She currently bounces between NY and CA, playing live and recording with musicians and friends (old and new) in Brooklyn, Oakland and Los Angeles.
